

AMAN ULLAH

Mid/Senior AI-Augmented Full-Stack Engineer

amanu4519@gmail.com | Islamabad, Pakistan | linkedin.com/in/amanullah01

PROFESSIONAL SUMMARY

Senior Full-Stack Engineer with 3+ years of hands-on experience building and shipping complex production web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js) alongside Next.js, Firebase, and AWS. Proven track record leading full product builds end-to-end — from architecture and front-end to back-end, DevOps, and deployment — as both a solo operator and a team lead managing interns and cross-functional teams. Deep expertise in Web3 and blockchain integrations including Ethereum, Polygon, Solana, WalletConnect, and smart contract interactions. An AI-first developer who leverages GitHub Copilot, ChatGPT, and Cursor daily to maximize output velocity and code quality. Excellent written and verbal English, ready to plug directly into US-based startup workflows.

CORE TECHNICAL SKILLS

Frontend	React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, MUI, AntD, Bootstrap
Backend	Node.js, Express.js, REST APIs, Firebase, Google Cloud Functions, Nest.js (familiar)
Databases	MongoDB, PostgreSQL, Firebase Firestore, AWS RDS
DevOps & Cloud	AWS (S3, EC2), Firebase Hosting, Netlify, CI/CD pipelines, Git, GitHub
Web3 / Blockchain	Ethereum, Polygon, Solana — WalletConnect, Phantom Wallet, Wombat, MetaMask, Web3.js, smart contract integration
AI Tooling	GitHub Copilot, ChatGPT / OpenAI, Cursor IDE — daily use for code generation, debugging, and AI-powered product development
Project Mgmt	Team & intern management, sprint planning, cross-functional collaboration, client requirements gathering, Agile delivery
Other	Figma (UI implementation), Photoshop (design-to-code), problem-solving, agile development

PROFESSIONAL EXPERIENCE

MERN Stack Developer | Car Advisers, Islamabad2024 – Present

- Leading full-stack development of a comprehensive automotive marketplace platform (similar to PakWheels) — owning both front-end (Next.js, React) and back-end (Node.js, Express, MongoDB) architecture.
- Built and shipped features for buying/selling cars, bikes, and auto parts with integrated admin dashboards, inspection systems, auction sheets, and specialized sections for armoured and electric vehicles.
- Implemented secure user, dealer, and workshop profile systems with public/private route management and data encryption for safe transactions.
- Managing interns and cross-functional teams across multiple concurrent projects to ensure smooth execution, milestone delivery, and on-time releases.

- Leveraging AI tools (GitHub Copilot, ChatGPT, Cursor) daily to accelerate feature delivery, generate test coverage, and maintain high code quality as a senior operator.

MERN Stack Developer | *Integency, Islamabad* 2023 – 2024

- Drove full-stack development across multiple simultaneous client products using React.js and Next.js on the front end, and Node.js/Express on the back end.
- Led development of Intraverse — a Web3-integrated dynamic web application built on React, Firebase, and Google Cloud Functions, featuring an extensive real-time admin dashboard, leaderboards, and a referral system.
- Built Mystery Madness using Next.js and Firebase: a live questionnaire competition platform with wallet integration enabling users to purchase tickets and earn bonuses in real time.
- Managed interns and coordinated delivery across teams, acting as both a senior developer and small-scale technical project manager.
- Integrated Web3 wallets including WalletConnect, Wombat, Phantom Wallet, Polygon, and Cloud Wallet across multiple platforms on Ethereum, Polygon, and Solana chains.

Front-End React Developer | *Integency, Islamabad* Apr 2022 – Jan 2023

- Collaborated on multiple client projects focused on building and enhancing React.js user interfaces with API integrations for streamlined data communication.
- Contributed to Crofundsme, a cryptocurrency-based web application, integrating Web3 wallets and refining the UI from Figma designs.
- Enhanced UI for the Spoflex sports platform — incorporating event-based, role-based, and social media-like features for a dynamic user experience.

Contract MERN Stack Developer | *AZ Techzone, Lahore* Aug 2023 – Sep 2023

- Delivered a full business website end-to-end — from translating Photoshop design mockups into functional React components to deploying the Node.js/Express/MongoDB backend.
- Participated in client discovery meetings for requirements gathering and project scope alignment, then executed delivery within the agreed timeline.

KEY PROJECTS

Car Advisers Marketplace — *Full-Stack Lead*

Comprehensive automotive marketplace with multi-product capabilities (cars, bikes, auto parts). Features include admin dashboards, inspection systems, auction sheets, armoured/EV vehicle sections, and encrypted user/dealer/workshop profiles with role-based access control. Stack: Next.js, Node.js, Express, MongoDB, AWS S3.

Intraverse — *Project Lead*

Web3-powered dynamic web application built on React, Firebase, and Google Cloud Functions. Led full front-end and back-end development. Features include a real-time admin dashboard, leaderboards, referral system, and multi-chain wallet integrations (Ethereum, Polygon, Solana — WalletConnect, Phantom, Wombat).

Mystery Madness — *Full-Stack Developer*

Live questionnaire competition platform built with Next.js and Firebase. Admin can create competitions, manage user lists, and edit questions in real time. Users purchase tickets via integrated Web3 wallets (Phantom, WalletConnect) and earn bonuses on Ethereum and Solana chains.

Direct Portal (NUST) — *Full-Stack Developer*

Research-based web platform developed for NUST officials in Pakistan. Involved continuous client meetings, full-stack development, and cross-functional team collaboration to deliver a comprehensive information and research portal.

Spoflex — *Full-Stack Developer*

Sports event management platform featuring tournament brackets, knockout stages, elimination systems, and role-based access for players and organizers. Built collaboratively with a full cross-functional team.

AZ Techzone Website — *Full-Stack Developer*

Complete business website built with React (frontend) and Express/MongoDB (backend). Features admin login, blog creation, game info management, and team management. Designed for visual appeal and ease of use, fully deployed to production.

AI STACK & DAILY WORKFLOW

AI-first engineering — daily tools and practices:

- GitHub Copilot: Real-time inline code completion across React, Node.js, and TypeScript for consistent, high-velocity output.
- ChatGPT / OpenAI: Daily use for architecture planning, debugging complex full-stack logic, API design, and generating documentation.
- Cursor IDE: AI-native multi-file editing for large codebase refactoring and accelerated feature development.
- AI-powered QA: Generating automated test suites and using AI to catch edge cases before production releases.

EDUCATION

Bachelor of Science in Computer Science (BSCS) Oct 2018 – Jul 2022

PMAS Arid Agriculture University, Rawalpindi (PMAS AAUR), Pakistan
